LIBRARY  
RECEIVED  
JUN 5 - 1958

As you can so plainly see by the illustrations Scarlet Lustre has an inimitably brilliant scarlet-red color that absolutely commands admiration. Augmenting this effect is the bulls-eye of yellow in the throat of each bloom. The flowers are 100 % grandiflora in size and character, measuring 3½ inches across and presenting the fancy waved and ruffled petal edges that have always been gardeners' favorites.

F<sub>1</sub> HYBRID GRANDIFLORA PETUNIA

Weakness of plant was a flaw in earlier red grandiflora hybrids, but no such weakness mars Scarlet Lustre performance. This husky F<sub>1</sub> hybrid is not only beautiful, it is vigorous and generous of bloom. Plants grow 1 foot tall, spreading two feet across, and best of all they bear lots of flowers over the whole area and during a very long blooming period.

9070 SCARLET LUSTRE.....Trade Pkt. 2.50; 1/32 oz. 14.50; 1/16 oz. 28.00; 1/8 oz. 52.00; 1/4 oz. 95.00; 1/2 oz. 174.00; 1 oz. 320.00.

# Blue Lustre

F1 HYBRID GRANDIFLORA PETUNIA

With the first garden plantings being made during 1958 Blue Lustre sets a proud standard of excellence for hybrids yet to be introduced bearing the Lustre name.

How does it excel? In beauty, bounty, endurance, and in style. The rich depth of color is beauty itself, for the blooms first open to the deep purple-blue of Elk's Pride, attaining warm reddish undertones as the flower matures or in hot weather, and finally ending as a silvery mid-blue, preserving all the while the high style of waved and gracefully reflexed petals.

In bounty it is unmatched among blue grandifloras, producing many more flowers than any other in our trials. This large crop of blooms is partly due to the number carried at one time on the plant, but it is even more the steady productive capacity of the plants. We have found Blue Lustre regularly the earliest grandiflora in our trials, and have been much impressed by its ability to continue to bloom without interruption until long after others have died.

9052 BLUE LUSTRE.....Trade Pkt. 2.50; 1/32 oz. 14.50; 1/16 oz. 28.00; 1/8 oz. 52.00; 1/4 oz. 95.00; 1/2 oz. 174.00; 1 oz. 320.00.

Electros of the color plate 3106J, shown above, are available for \$55.00. A cut-down of the single flower in the upper left corner is numbered 3113G and is available for \$40.00. The large signature on the opposite page is number 3111, and the small signature on this page is number 3115. The price of either signature is \$20.00.

Red Satin has been honored with high awards in the All-America Selections, International Flower Show, and countless local competitions, but it is not only flower judges who admire this  $F_1$  hybrid petunia. The virtues of Red Satin are plainly evident even to the most inexperienced eye.

Virtue number one is color. The flowers are the most dazzling, intense scarlet-red in petunias, and they stay that way right to the end of the season.

 **$F_1$  HYBRID PETUNIA**

Electros of the color plate number 3094G (above) are available for \$40.00 per set, or for the signature number 3101, here at the bottom of the page, for \$15.00.

Virtue number two is plant type. Everyone appreciates the fact that this is one petunia that stays neat, compact and globe-shaped in any weather and at any age.

Order early to be sure of supplies of this popular hybrid.

Electros of this illustration #3110H are available for your catalog at \$47.50 per set.

Pink Satin was the most photographed hybrid in our trials during 1957, and this is quite an achievement when you consider the fact that we had over two thousand petunia trial rows to choose from.

The reason no one with a camera could pass it by was the fact that it always seemed to be at the peak of perfection, with multitudes of bright rose-pink blooms, perfect compact mound shape, and fascinating satiny texture.

Electros of the color plate shown above, number 3109GA, are available at \$40.00 per set. The signature at the bottom of the page is number 3103, available for \$10.00.

While Peach Satin has a flower color exceedingly difficult to represent on paper, to many people it is the most appealing in the F<sub>1</sub> hybrid Satin series. Young blooms are almost coral in tone, softening as the flower unfolds to a warm salmon-pink. Plants are compact, floriferous and long-lasting.

9016 PEACH SATIN.....Trade Pkt. 1.45; 1/32 oz. 8.50; 1/16 oz. 16.00; 1/8 oz. 29.00; 1/4 oz. 53.00; 1/2 oz. 98.00; 1 oz. 180.00.

**F<sub>1</sub> HYBRID PETUNIA**

This year, after a number of generations of breeding and trial, we are proud to introduce Confetti, an F<sub>2</sub> multiflora petunia mixture of unusual merit.

Our goal in this mixture has been to attain only clear, sharp colors, rejecting any lines which broke down into faded-looking blooms. The result is a very gay color series, ideal for bedding purposes.

The plants are of the nana compacta type, 12" to 16" tall, and reveal their hybrid breeding by the large number of blooms, vigor and strength of plant, and sustained flowering period.

9078 CONFETTI ..... Oz. 5.00; lb. 50.00

Electros of the color plate #3121G (above) are available for \$40.00 per set, and of the signature #3090 (left) for \$20.00 per set.

Electros of the illustration at the bottom of this page, #3084G, are available for \$40.00 per set. The signature at the right is number 3088, for \$20.00.

Through skillful application of modern breeding techniques this F<sub>2</sub> grandiflora petunia mixture affords an immense color range in predominately waved, ruffled or fringed 3½-inch flowers. The hybrid vigor in these plants makes this one fancy petunia that is reliable in any home garden.

9076 CARNIVAL ..... 1/16 oz. 2.50; ¼ oz. 7.50; oz. 25.00

Crackerjack has turned out to be one of the most respected flower varieties in the world, and certainly the most widely adapted giant african marigold mixture ever planted.

Strongly favorable reports have come in from South Africa, Australia, New Zealand, many countries in Europe, Canada, the United States, and even Alaska, where large flowered marigolds had never been grown before. Formal honors have been frequent and widespread, including a Highly Commended rating by the Royal Horticultural Society at its Wisley Trials in 1957.

All in all, this is a variety which simply displaces older african mixtures such as Sunset Giants. The reasons for this rapid change-over are several.

Instead of being very late to flower, Crackerjack blooms several weeks ahead of other african marigolds, early enough to be useful even in the far north. Instead of being variable in flower size Crackerjack is uniformly large-flowered. We have never seen or had any report of single flowers showing up in the mixture. Instead of being so tall as to be easy prey to wind and of awkward height in the garden, Crackerjack is compact, bushy, and only two-thirds the height of Sunset Giants. Instead of burying good flowers beneath the foliage, Crackerjack holds them all proudly in view. Instead of being a chance color range as in a field-grown mixture, Crackerjack is kept in perfect balance by having its primrose, yellow, gold and orange components grown separately and blended for accurate control.

Many seed houses have already abandoned all tall african marigolds in favor of Crackerjack, and we suggest that you do so, too. Excellent colored lithographed packets are available from both Schmidt and Stecher-Traung. If you can use quantities of 20 lbs. or more, please write for special prices.

4996 CRACKERJACK ..... Oz. 1.25; lb. 10.50

Electros of the color plate number 3092H, shown below, are available for \$47.50 per set. You may also obtain electros of the signature on the opposite page, #3091, at \$20.00 per set.

# Mandarin

## Cosmos

Mandarin exhibits two important improvements over older cosmos varieties. The brilliant orange flowers are strongly double, with as many as 40 petals, and the plants excel in unusually heavy, tenacious foliage.

Electros of this color plate,  
#3105G are available at \$40.00

**ZINNIA**

Here is a new giant cactus flowered zinnia that genuinely glows with color. The scarlet flame center is surrounded by outer petals of bright golden orange, and the plants are both husky and most generous of bloom.

1308 PRIDE OF DIELDRIN ..... Oz. 1.45; lb. 13.50

Electros of the color plate below,  
 #3114G, are available for \$40.00  
 per set, and of the signature above,  
 #3116, at \$20.00 per set.

The most widely distributed zinnia novelty in years, Ortho Polka has quickly captured the public fancy wherever zinnias are grown. They like it because it's big, bold, and novel.

It is really not enough to say Ortho Polka is a giant flowered Peppermint Stick, for while it is true that the flowers are double the size of the older strain they are also different in character. Peppermint Stick is a pumila type; Ortho Polka is a giant striata mixture with typical flat, broad, 4 inch flowers and wide, well-separated petals.

Colors in this bright mixture are extremely varied. They include combinations of pink and white, rose and white, lavender and white, purple and white, scarlet and yellow, orange and yellow, red and orange, as well as some solidly colored flowers. We have altered our planting formula this year to increase the percentage of yellow and orange blooms with scarlet striping, making the effect in garden displays even more colorful and more prominently striped.

The extent of variations in marking is surprising, for even on a single plant bearing rose and white flowers, for instance, early blooms may be almost entirely white with flecks of rose on a few petals, later they may be white with distinct rose stripes, still later the proportion of rose and white may become evenly divided either in dots or stripes, and some appear strongly rose with white markings. You will occasionally find blooms that are divided right across the middle, with one half the flower one color and the other side a contrasting color — a most startling effect.

This continued variation in color markings keeps the gardener's interest at a peak all summer. We, too, find it hard to confine ourselves to only a short walk in the production fields, for there is always one more interesting combination a little farther down the row.

Both Schmidt and Stecher-Traung have excellent color packets.

1586 ORTHO POLKA ..... Oz. 1.25; lb. 10.50

Electros of the Ortho Polka plate on the back cover #3097K are available at \$70.00 and cut-downs like this one #3098H for \$47.50 per set.

Firmly established as the leading  $F_2$  hybrid snapdragon, Mardi Gras combines the advantages of earliness (to escape damaging heat) with hybrid vigor for long spikes and the extreme color range possible only by the precise application of the  $F_2$  breeding method. In a good sized planting you can count at least 20 colors and color combinations.

1898 MARDI GRAS ..... Oz. 1.50; lb. 15.00

Electros of this illustration #3096G are available for your catalog at \$40.00 per set, or of the signature at the top of the page, #3089, at \$20.00 per set.

## PICTURES, PLATES AND PUBLICITY

**EKTACHROMES:** If you need Ektachromes for full color reproduction purposes (either letterpress engravings or lithographic separations) we can usually supply high quality 4 x 5 or 8 x 10 inch color photographs on a loan basis, the Ektachrome to be returned after use. Please write for information about availability of specific subjects in which you are interested. Sixty day rental fee ..... Each \$15.00

**PHOTOGRAPHS:** We can supply, at cost price to us, professional quality photos of (1) all varieties of which we offer seed, (2) most varieties we have listed in recent years, and (3) certain subjects we do not normally grow; usually several poses of each subject. All photos are 8" x 10", single weight glossy paper. .... Each \$2.00

**KODACHROME SLIDES:** We can supply high-fidelity 35mm slides (2" x 2") of many of the flowers we grow. These are close-ups of individual flowers or groups, manufactured from our professional-size originals. Each 50c

**HORTICULTURAL COLOR CHART:** This is the most complete and useful compilation of horticultural colors available in the world. Assembled in two volumes of individual, unbound sheets which greatly facilitate color matching, the set is issued in collaboration with the Royal Horticultural Society and includes 200 pages with four graded tones of color on each page — a total of 800 different color blocks. The descriptive material includes equivalent color names in four other systems (such as Ridgeway), the synonyms in six foreign languages, and horticultural examples (for instance, color block 640/2 represents the color seen in *Scilla campanularia*). In the Bodger catalog the sweet peas, which are frequently distinguished by minor color differences, are adequately described by one or two sets of figures taken from this color chart.

For the immense versatility and wide acceptance in horticulture the price is very low. Complete set of two volumes, just ..... \$12.00

**PUBLICITY MATERIAL:** Each spring we send a series of releases of garden information to hundreds of newspapers, radio and television stations, and magazines. They are widely used by garden editors. If you have need for this type of material, or if you have a suggestion to make concerning the addition of a publication or station to our list, just drop us a line and we'll be glad to comply. The service is free.

## PICTURES, PLATES AND PUBLICITY (con't.)

**ELECTROS:** We can supply electrotypes for use in printed matter of a great number of the pictures offered on the preceding page. 120 screen, usually square finish. Chosen from our Electro Catalog, our seed catalogs, or a selection of photos, and **MADE UP TO ORDER ONLY**. Allow ten days for completion of your order. Prices below apply to copper. For nickel-steel, add 25 %.

**COLOR PLATES:** We have a large selection of color plates available. 120 screen, square finish, vinyl mold nickelsteel. Chosen from our Electro Catalog, our seed catalogs, or proofs submitted, and **MADE UP TO ORDER ONLY**. Allow ten days for completion of your order.

Electros and Color Plates are supplied unmounted (patent base) unless mounting is specifically requested. There is an additional charge of 25 % for mounting. If we do not have an electro the size you need, you can purchase a photo and have your printer make a cut for you. Electro Catalog available free.

### ELECTRO PRICES ARE AS FOLLOWS:

**Note:** Our electro prices directly reflect the standard electrotyper's scale in Los Angeles, which in turn reflects the high wages now paid in the engraving industry. We cannot control this. Before ordering, consult your printer. In some localities he may be able to have engravings made at lower cost than our prices.

# ASTERS

All Asters listed here can be grown by the home gardener wherever Asters are popular. Most of these Asters are also in great demand as florist's commercial varieties, especially those marked "f". In any case, seed we offer is of highest florist quality.

## PRINCESS ASTERS (BODGER)

An ideal type for florists, suitable also for home gardens. Flowers have crested center that remains full when flower is completely open, surrounded by multiple rows of guard petals.

### ASTER PRINCESS IMPROVED WILT RESISTANT (Marsha type)

New, compact branching plant form (identical with that of the variety Princess Marsha) 20" - 24" high, completely covered with 3" true Princess flowers when plants bloom in late August. Long stemmed blooms keep excellently when cut, while plants provide the best garden landscaping color when planted at 9" spacing. These varieties are so superior in plant and flower that we have dropped the old Princess strain from our catalog.

A superior strain of good vitality developed recently on the Pacific Coast, containing single and semi-double flowers with a greatly improved color range, especially in the desirable light shades. 1000 seeds equal approximately  $\frac{1}{8}$  ounce.

Best germination results from the following technique. Dust seed with chlordane to prevent pre-emergence insect damage. Sow on top of seed bed, covering as lightly as possible with peat or similar material. Hold only slightly moist for first 4 days and give heavy moisture thereafter. Germination begins in 7 to 9 days and is complete in 14 days.

**LARKSPUR**

Larkspur Regal Brilliant Rose  
With the addition of this desirable color to the Regal class the color range is now complete. If you have been listing Giant Imperial Brilliant Rose be sure to switch to this new strain.

**LARKSPUR REGAL STRAIN (af)**

Retains the desirable height and basal branching habit of the Giant Imperials, but has Delphinium-like florets on long, thick spikes. Vigorous and early. The finest Larkspur on the market today.

### **HIGH HUMIDITY KILLS SEED**

In seeds as well as in people, "It ain't the heat—it's the humidity!"

The storage conditions you give your seeds can reach any reasonable warehouse temperature if you can keep the seed dry. Dry conditions help, even on a short-term basis, the drier the better.

## F<sub>1</sub> HYBRID PETUNIAS

Extremely vigorous, generally low-growing, mound-shaped plants covered with flowers even under difficult growing conditions. For garden bedding and border use; each plant covers 24" (65cm) of space when mature, except the Satins which are more compact, and flowers until frost. Approximately 345,000 seeds per ounce. Offered only in sealed packets.

A trade packet contains approximately 1/192 of an ounce. Orders for 1/32 oz. or more of F<sub>1</sub> petunias will be filled in sealed trade packets if you wish, at no extra charge. For example: An order for 6 trade packets will be priced the same as for 1/32 oz., 12 trade packets the same as for 1/16 oz., etc. Please specify "in packets" or "in bulk." We cannot accept orders for less than one trade packet.

If you would like to have a mimeographed sheet of cultural instructions for germinating F<sub>1</sub> hybrid petunias, just ask us for it. The instructions are written particularly for professional growers.

### PETUNIA F<sub>1</sub> HYBRID MULTIFLORA (af)

....9026 RED SATIN (Bodger) **ALL-AMERICA SELECTIONS** '57. The new and vivid scarlet-red dwarf All-America winner pictured and described on pages 6-7.

....9016 PEACH SATIN (Bodger), a lovely new multiflora with unusually large flowers which open first to a coral color, changing the next day to an appealingly soft salmon-pink. Plants are well-behaved, compact and carry the will-to-bloom feature so prominent in the best F<sub>1</sub> hybrids. Described and pictured on page 9.

....9018 PINK SATIN (Bodger), fine, dwarf, globe-shaped plants with a solid mass of satiny, lustrous, bright pink blooms. An inch or so taller than Red Satin, but of the same compact habit that just doesn't split open as the plant grows older. Described and pictured on page 8.

....9052 **BLUE LUSTRE** (Bodger), new and wonderful, the big, waved grandiflora flowers are deep mid-blue in hot weather, becoming almost as dark as Elk's Pride in cool weather. Plants grow 1 foot tall and 1½ to 2 feet across, beginning to bloom very early and continuing without interruption to the very end of the season. For more complete description and color picture see pages 4-5.

....9070 **SCARLET LUSTRE** (Bodger), glowing and vivid scarlet blooms with waved and fringed petal edges and a bright yellow throat make this new grandiflora hybrid an instant favorite. Unlike earlier attempts in this color of grandiflora petunia, Scarlet Lustre is sturdy of plant and generous of bloom. Plants reach a height of only 1 foot, spreading to 2 feet across and blooming steadily over the entire area. For more complete description see the illustration on the front cover and pages 2 and 3.

#### **SWEET PEA ZVOLANEK MULTIFLORA (af)**

A garden sweet pea more vigorous than Early Spencers, yet true winter flowering for florists. Under ideal conditions Multifloras produce longer and stronger stems, larger florets and more of them. Under any conditions they produce an average of two more florets per stem than the Early Spencers. We recommend this strain.
